Metal Rolling Tool Cabinet

CYJY is a Chinese factory specializing in the manufacture of **metal rolling tool cabinet**. The overall frame of the **metal rolling tool cabinet** is made of cold-rolled steel plate material, which is strong and stable. The drawer is made of galvanized steel material, which is anti-corrosion and anti-rust. The handle is made of 304 stainless steel, which is corrosion-resistant and high-temperature resistant, and has high performance. There are 23 drawers on the cabinet and 2 drawers inside the cabinet, which can be used to classify and store tools or parts. Liners can be customized inside each drawer to prevent tools or parts from sliding and being damaged. The color, style and size of the entire cabinet can be customized according to your needs. Your consultation and order are welcome.

FAQ

Q:What are the disadvantages of metal rolling tool cabinets?

A:If overused, stainless steel can make your area look like a hardened commercial kitchen, not a welcoming place for friends and family. Stainless steel is also susceptible to scratching, fingerprints, and smudges

Q:Why are metal rolling tool cabinets off the floor?

A:Getting the cabinets off the floor is a simple solution. It keeps stored items safe from moisture and mold growth that can potentially cause health problems for the inhabitants. Wall-mounted cabinets offer a slew of benefits, but installing them can be tricky.

Q:Is a metal rolling tool cabinet better than wood tool cabinet?

A:Quite simply, metal is a more durable material than wood. Metal can withstand high snow loads and extreme weather, plus it takes a lot more effort to break into compared to wooden garages. For additional peace of mind, install a security system on your property.
